About Us

The journey began in 1962, when Kesarbai Ji, with hope in her eyes, guided her sons through hardships, teaching them the values of perseverance, integrity and unwavering dedication.

Her eldest son, Mr. Hukum Chand Agrawal, inspired by her determination, started a humble papad venture with just 150 and 5 kg of moongdal . With his younger brothers, Mr. Kailash Chand & Mr. Prakash Chand, he began shaping a dream that was rooted not merely in business, but in family values, honesty and the belief that quality can transform lives. What began as a small-scale papad production unit soon evolved into something much bigger. The three brothers worked tirelessly often hand-rolling papads, managing early sales and personally delivering orders-each step carrying their mother's blessing and the family's deep respect for quality.

Over the years, this foundation of trust & purity allowed the brand to grow beyond expectations. As Agrawal 420 expanded, it diversified into multiple categories such as Namkeen, Spices, Instant Mixes and Sweets . However, it is the Namkeen category that truly became the heart and pride of the brand. From classic traditional mixtures to innovative blends crafted for modern tastes, the Namkeen segment stands today as the company's strongest pillar-representing both cultural legacy & Trendy appeal. It reflects the group's continuous effort to blend authentic flavours with world-class manufacturing standards.

Today, Agrawal 420 serves millions of families across India and abroad, staying committed to quality, hygiene and the promise of genuine taste. What started as one mother's dream has now become a symbol of trust passed down through generations- a brand built on hard work, unity and unshakeable family values.

The Truly
**International
Presence**

From India To
Exports in Diffrent Countries Wroldwide.

**TASTE OF INDIA
WHEREVER YOU GO**

TASTE WITH TRADITION | HYGIENE | QUALITY

As the demand for our Namkeen raised manifold along with increased capacities, he incorporated modern methodologies of quality control and hygienic plant management.

Directors of the group, some of them with more than 20 years of experience in the field, directly handle the quality control department.

The basic food materials come from 420 Namkeen own mini flour grinding mill, so that the company can exert total control over product quality. The pulses, grains and fruits are sourced from Western India's best markets on peak seasons, with define laid down specification and desired storage condition (kept in scientific storage.)

The automated packaging unit enables long-lasting freshness & total hygiene of the products.
